

SimPlant™ / Facilitate™ CT Conversions

Fast, Affordable Proven Quality

- Thousands of successful cases. Customers include leading maxillofacial imaging centers
- Conversions in Planner, Pro, Master and Viewer formats
- Same day turnaround with electronic data transfer
- \$100 for basic conversion, \$150 with custom rendering
- Outstanding customer support
- Working partnerships with scan centers across country

The 3DDX Advantage For Pro/Master Users

Reduce case processing time, eliminate hassles and save money; turn the job of converting CT scans into 3D images to 3DDX. Our highly-trained, full-time conversion specialists understand what you're looking for. Just send us your scans; we'll do the rest giving you high-quality images the same day.

3D Diagnostix Inc. has saved us time and effort and has enabled us to provide superior diagnostic services to our clients. The number of referrals to our center has steadily increased over the months, due in part to our use of 3DDX.

– Dr. Bernard Friedland, B.CH.D., MSc., J.D.
Head Division of Oral & Maxillofacial Radiology
Harvard School of Dental Medicine, Boston, MA

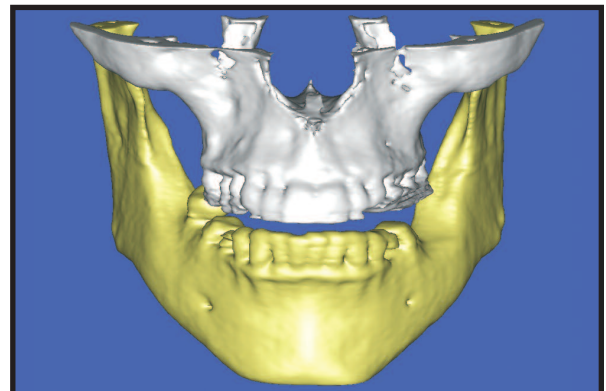

3DDX image processing services are very reliable, they are very easy to deal with despite being 5000 miles away.

– Dr. Clive C. Schmulian, Clyde Dental Practice
Scotland, U.K.

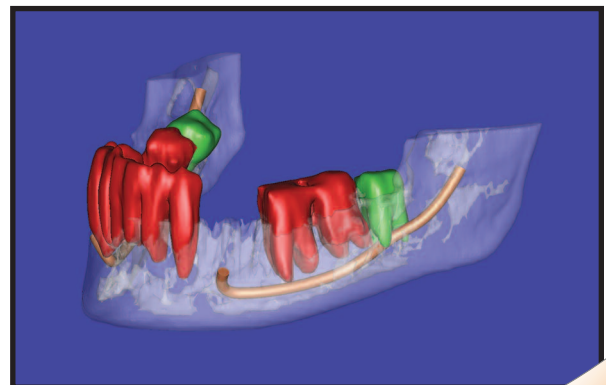

3DDX takes a CT or CBCT image like this...

Converts it into a SimPlant/Facilitate readable file...

Even adds custom colorization...

Training/Interpretation Services

Software Training, Rad. Interpretations And Treatment Plans

3D Diagnostix Provides The Services To Optimize Your Implant Practice

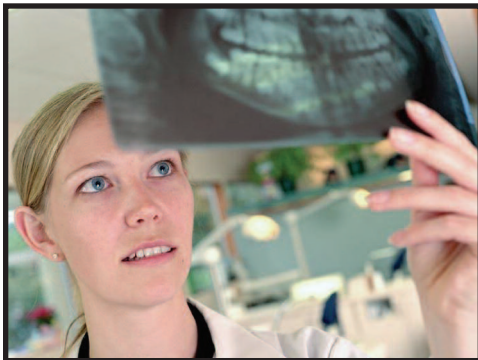

One-on-One SimPlant™/Facilitate™ Training

Basic: Working with your instructor, over the Internet, you'll learn by doing – zoom, pan, rotate, and manipulate an actual image. Work with a 3-D model, make measurements and use planning tools. Learn everything to plan implant procedures from CT scanning to visualization.

Advanced: You can use one of your own cases, measure bone quality and quantity, create virtual abutments, teeth and sinus grafts. Create and edit an implant treatment plan. Learn benefits to using, and types of, surgical guides as well as how to order them.

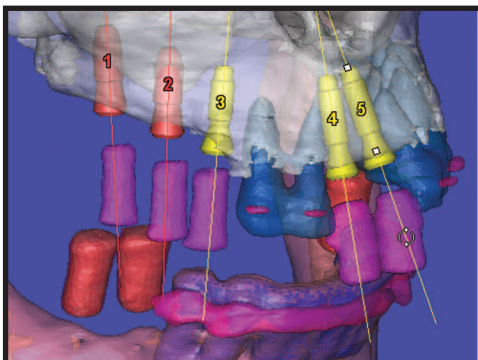

"I really liked the idea of being trained on my own case rather than having a one implant case [provided by instructor] as study material. I cannot imagine learning the software in a different way...it was cost-effective, time-effective and, above all, practically beneficial."

– Jeffrey Dornbush, D.D.S., Marblehead, Massachusetts

Radiographic Interpretation Services

- Scans are read by a board-certified oral radiologist
- Comprehensive PDF report prepared
- 24- to 48-hour turnaround
- Areas of interest include pathology, TMJ/sinus evaluation, implant sites, etc.

Clinician-Reviewed Implant Planning Services

- Treatment plans are reviewed by practicing implant specialists
- You choose the software for plans – SimPlant™, Facilitate™ and other planning software
- If you don't have implant software, 3D Diagnostix can send your completed plan in a free viewer
- Ask us about surgical guide and surgical kit options
